STUDENTS SATISFACTION SURVEY REPORT (2017-18)

Abhilashi College of Education, an institute of academic excellence and achievement, was established in 2003. At Abhilashi College of Education, we impart an all round education so that our students may become multidimensional rather than unidimensional. We believe in providing our students an environment, rich in knowledge and supportive for their extracurricular interests. We aim to evaluate our students on the basis of their physical, mental, social, emotional and intellectual development. In the year 2017 the college is accredited with “A” grade by National Assessment and Accreditation Council for its quality education and best infrastructure. Abhilashi College of Education is the first B.Ed. College in the state in private sector which is accredited with “A” grade by NAAC. Our College takes pride in upgrading its quality and eminence through constant feedbacks/surveys. Students Satisfaction Survey (SSS) is one amongst these surveys that benefits in updating the superiority of our academic excellence. The Students Satisfaction Survey (SSS) comprises of the questionnaire endorsed by the NAAC. To assess the outcomes of the college, student satisfaction survey was conducted on different components given in the proforma. There are total 16 components in the proforma and 5 point rating scale is used for assessing the feedback. Students have valued the question on a scale of 1 to 5. The outcome of this survey is based on the response of B.Ed. outgoing students. The responses given by the students for the questionnaire is demonstrated by statistical analysis. The institute ensures that the students are provided various platforms to reach the authorities with their suggestions and feedback. Apart from the formal feedback taken from the students. They can convey their concern if

any, through a suggestion box placed at the main entrance. Also the students can send their suggestions through college email. The feedback taken from students was analyzed by calculating the mean of every component. The overall rating was calculated by adding the mean of each component. The result obtained after analyzing the feedback of students, revealed that the training methodology used by the teachers, Syllabus coverage and intellectual enrichment of the students possess highest scores. It is observed that the academic environment, dealing of Principal and administrative staff and interaction of teachers with students is very good. It has been found that the computer facilities, co-curricular activities, pre-preparation by teachers are quite good. It has been also observed that the use of laboratories and TLM is adequate in the campus. To make the teaching learning process more live, use of technology along with advanced teaching learning material was enhanced. The overall rating was 4.9, which depicts that components used for taking feedback from the students is admirable.
